Dammam, Saudi Arabia

PROFESSIONAL SUMMARY

Results-driven Electrical Engineer with 5+ years of progressive experience in power distribution systems, instrumentation, gas detection systems, and MEP installations within the oil & gas and marine sectors. Expertise in managing complete system-based projects from design through commissioning while maintaining strict safety compliance and ISO standards. Proven track record in offshore installations, BA systems, H2S detection, and emergency response planning.

TECHNICAL SKILLS

Power Systems: Power Generation, Transmission & Distribution, Load Flow Analysis, Protection Systems, Transformer Maintenance

Instrumentation & Control: Gas Detection Systems (H2S, LEL, O2), Honeywell Analytics (Sensepoint XCD, MicroDock II), BW Technologies (GasAlert, MicroClip, Max XT II), Breathing Apparatus Systems (SCBA, EEBD, ELSA), BA Cascade Systems

MEP Systems: BMS, Fire Detection & Protection, HVAC, Lightning Protection (LPS), UPS Systems, Generator Synchronization

Low Voltage Systems: ELV Integration, CCTV, PA Systems, Networking, Medical Gas Systems, Lighting Design

Standards & Codes: IEC, NFPA, IEEE, NEC, Saudi Electricity Code, OSHA Safety Standards

Software: AutoCAD, ETAP, MS Project, BOQ Preparation, Rate Analysis

PROFESSIONAL EXPERIENCE

Senior Electrical Engineer - E&C

July 2024 – Present

Solas Marine Services Group, Kingdom of Saudi Arabia

- Execute complete system-based projects for marine and offshore installations from design through commissioning, ensuring adherence to Class, Owner, and Shipyard specifications
- Lead project planning including manpower allocation, resource management, and scope definition with clear stakeholder alignment
- Oversee installation of electrical systems in accordance with design drawings, procedures, and safety requirements while maintaining ISO and HSE compliance
- Manage subcontractor teams ensuring quality workmanship, safety protocols, and timely completion of installation, testing, and commissioning
- Conduct final system testing and commissioning to meet satisfaction of classification societies, vessel owners, and shipyards

Junior Electrical Engineer

May 2023 – July 2024

Solas Marine Services Group, Kingdom of Saudi Arabia

- Managed H2S gas detection systems across offshore facilities, achieving 99.8% uptime and full regulatory compliance
- Led BA cascade system operations (SCBA, EEBD, ELSA) with regular inspections and certification procedures
- Reduced BA compressor downtime by 30% through proactive maintenance scheduling
- Conducted safety training for 50+ personnel on gas detection and BA equipment, achieving zero safety incidents

Electrical Engineer

Jan 2022 – May 2023

Pearl Construction, Sri Lanka

- Designed power distribution systems for commercial buildings including load calculations, cable sizing, and protection coordination
- Integrated ELV systems (CCTV, network infrastructure, PA, telephone) and designed IEC 62305-compliant LPS for 5+ high-rise buildings
- Commissioned generator synchronization systems and maintained UPS systems for critical loads
- Implemented fire detection systems with BMS integration and ensured regulatory compliance with comprehensive documentation
- Ensured project compliance with local electrical codes and prepared comprehensive documentation for regulatory approvals

Trainee Electrical Engineer

Ceylon Electricity Board, Sri Lanka

- Conducted testing and commissioning of electrical installations and performed maintenance on LV distribution lines and substations
- Assisted in power transformer protection schemes and maintenance procedures with hands-on relay coordination experience
- Participated in hydro power station operations and learned substation protection and control systems

Apr 2021 – Oct 2021

MEP Engineer (Trainee)

Central Engineering Services PVT Limited, Sri Lanka

- Supported MEP installations including power distribution, lighting design, HVAC systems, and medical gas systems
- Prepared BOQ and rate analysis for electrical installations and maintained fire panels and ELV systems

Oct 2021 – Jan 2022

KEY PROJECTS

Offshore Safety Systems Deployment & Maintenance

Solas Marine Services Group

- Deployed and maintained critical safety systems across offshore facilities ensuring regulatory compliance and operational readiness
- Managed H2S gas detection systems achieving 99.8% uptime and full compliance with Saudi safety standards
- Led BA cascade system operations (SCBA, EEBD, ELSA) with regular inspection and certification procedures
- Reduced BA compressor downtime by 30% through proactive maintenance programs
- Conducted safety training for 50+ personnel on gas detection and BA equipment, achieving zero safety incidents

May 2023 – July 2024

Commercial Building Power Distribution & Safety Systems

Pearl Construction

- Designed and executed electrical installations for multiple commercial buildings including complete power distribution systems
- Performed comprehensive load calculations, cable sizing, and protection coordination for optimal system performance
- Integrated ELV systems (CCTV, network infrastructure, PA, telephone) with main electrical installations
- Designed and installed IEC 62305-compliant lightning protection systems for 5+ high-rise buildings
- Commissioned generator synchronization systems and UPS installations ensuring uninterrupted power for critical loads
- Implemented fire detection systems with BMS integration, enhancing building safety and automation capabilities

Jan 2022 – May 2023

EDUCATION

Bachelor of Electrical and Electronic Engineering Technology with Honours

Lincoln University College, Malaysia

2022 – 2024

Higher National Diploma in Electrical & Electronic Engineering (Electrical Power Engineering)

Advanced Technical Institute, Sri Lanka

2018 – 2022

CERTIFICATIONS & PROFESSIONAL MEMBERSHIPS

Professional Memberships: AM-IIESL (AM7864) | EDECSL (503267) | MIET-UK (1101223471)

Safety Certifications: E-BOSIET (FMTC Safety) | H2S & SCBA Awareness | Work at Height

Technical Certifications: Honeywell Analytics University (8 certifications: Sensepoint XCD, MicroDock II, GasAlert Series, BW Technologies, IntelliDoX, Touchpoint Plus Controller)
